

2015 MASTER GARDENER PLANT SALE

Note: Quantities limited, no guarantee of availability. All plants require full sun unless otherwise noted under "Comments."

2015 VEGETABLES and FRUIT

Common Name	Variety and/or Cultivar	Botanical Name (Genus and species)	Annual	Perennial	Days to Maturity	Height	Comments
EGGPLANTS:							
Eggplant	'Amadeo'	<i>Solanum melongena</i>	x		65	36"	Moist, well-drained soil; known for huge yields of tender, nutty, bitter-free fruit on spineless plants; well-branched and vigorous; support probably needed once it begins bearing the heavy (5" wide, 8"long) dark purple to black eggplants because the yield is too great for this compact plant to hold up alone; easy to pick and delicious.
Eggplant	'Pingtung Long'	<i>Solanum melongena</i> <i>var.esculentum</i>	x		65-75	18-36"	Asian heirloom; beautiful, dark lavender skin and white flesh; elongated, slender ½ lb. fruits average 10" long and 1-2" across; mild flavor is great for stir frying; disease resistant; tolerant of wet and hot conditions.
PEPPERS:							
Pepper, Mildly Hot	'Ancho 211 (F1)'	<i>Capsicum annuum</i>	x		68 green/ 88 red ripe	18-24"	Heart-shaped, thinner-walled fruits turn from black-green to red, and are mildly pungent for the best chile rellenos; full sun.
Pepper, Mildly Hot	'Highlander (F1)'	<i>Capsicum annuum</i>	x		65 green/ 85 red ripe	24-36"	Mild pepper; traditional, semi-flattened, mostly two-lobed fruits average 7" x 2"; large, tall plants; early and adaptable; bred to have good productivity even in cooler regions where Anaheim type peppers often are shy yielding; fruits ripen to red but are usually used green for stuffing, grilling, or roasting.
Pepper, Hot	'Havasu (F1)'	<i>Capsicum annuum</i>	x		60 yellow/ 80 red ripe	24-36"	High yielding Santa Fe type pepper; thick walled conical fruits are avg. 3" x 2"; commonly stuffed like poblanos but spicier; usually harvested pale yellow but also can be used orange or red.
Pepper, Sweet	'Ace (F1)'	<i>Capsicum annuum</i>	x		50 green/ 70 red	18-24"	Highly productive yields of 3-4 lobed medium-sized fruits; glossy green fruits turn red early; performs well in cool climates where bell peppers are difficult to grow; grows well in containers; flavor sweetens as peppers change from green to orange to red; apparent tolerance to blossom drop since nearly every flower produces a pepper.
Pepper, Sweet	'Carmen (F1)'	<i>Capsicum annuum</i>	x		60 green/ 80 red ripe	28"	Sweet, tapered 5 oz. peppers avg. 6" long x 2½" wide; upright, medium-size plant; great for salads, roasting, sautéing; early, productive, and delicious.
Pepper, Sweet	'Cupid (F1)'	<i>Capsicum annuum</i>	x		55 green/ 75 red ripe	24-36"	Early, sweet mini-bell pepper avg. 2" x 2", large, well branched plants protect fruit from sunscald; fruit is particularly sweet when red.
Pepper, Sweet	'Flavorburst (F1)'	<i>Capsicum annuum</i>	x		70-75	18-36"	Lime green fruits mature to deep gold when ripe; elongated, 3-lobed, blocky, 4" by 4" sweet flavored peppers have thick walls with a crunchy, juicy, texture; uniform and heavy yielding plants; salads, salsa and stuffing.

2015 VEGETABLES and FRUIT

Common Name	Variety and/or Cultivar	Botanical Name (Genus and species)	Annual	Perennial	Days to Maturity	Height	Comments
Pepper, Sweet	'Islander (F1)'	<i>Capsicum annuum</i>	x		56 violet/ 81 red ripe	24-36"	Strong, well-yielding plants; 3-lobed, medium-size, thick-fleshed; mild sweet flavor; fruits ripen through showy stages of color violet, yellow, orange to red; resistant to Tobacco Mosaic Virus.
Pepper, Sweet	'Tangerine Dream'	<i>Capsicum annuum</i>	x		70-80	12-18"	Low-growing spreading plants with dark green foliage and bright upright fruit are both ornamental and culinary; fruit is sweet, mild, and grows in clusters of three to four; use fresh or cooked; average water needs.
TOMATOES:							
Tomato, Beefsteak	'Big Beef Hybrid'	<i>Solanum lycopersicum</i>	x		73	n/a	Old-time tomato flavor; smooth, round 9-16 oz. fruits; large fruit size and yield; superior disease tolerance; tolerant of, or resistant to, Verticillium Wilt, Fusarium Wilt races 1 and 2, Tobacco Mosaic Virus, Root Knot Nematodes, and Stemphylium (Gray Leaf Spot). <u>Indeterminate.</u>
Tomato, Cherry	'Chocolate Cherry'	<i>Solanum lycopersicum</i>	x		70	n/a	Extremely flavorful, uniform, 1" chocolate-red fruits in trusses of 8 which hold stems well; skins don't crack; can be picked several days before maturity and allowed to ripen off the vine without sacrificing quality. <u>Indeterminate.</u>
Tomato, Cherry	'Jasper (F1)'	<i>Solanum lycopersicum</i>	x		60	n/a	New! Small, deep red cherry resists late blight; round, bite-sized fruits are crack resistant, borne on small trusses, and store on the plant well, resisting cracking and rot; pleasantly chewy texture, and sweet, rich flavor; plants are extra vigorous and tall, staying healthy for a long picking period; <u>intermediate resistance to late blight and early blight, Septoria Leaf Spot, Fusarium Wilt . Indeterminate.</u>
Tomato, Cherry	'Sungold Hybrid'	<i>Solanum lycopersicum</i>	x		57	n/a	Very early, and a heavy cropper; exceptionally sweet, bright tangerine orange-colored fruits on vigorous long-blooming plants; thin-skinned, bite-sized fruits with a juicy flesh that holds its sweet, fresh-from-the-vine flavor, resistant to Fusarium Wilt (Race 1) and Tobacco Mosaic Virus. <u>Indeterminate.</u>
Tomato, Cherry	'Sunpeach (F1)'	<i>Solanum lycopersicum</i>	x		60	n/a	Vigorous, high-yielding plants; very sweet, pink fruits on long trusses, resist cracking; less tangy and acidic than Sungold; resistance to leaf mold and Tomato Mosaic Virus. <u>Indeterminate.</u>
Tomato, Cherry	'Sweet Million Hybrid'	<i>Solanum lycopersicum</i>	x		60	n/a	Long chains of smooth, dark red, 1-1½", very sweet, and crack resistant fruits; large vigorous plants; fruits early maturing and continue producing until frost; resistant to Fusarium Wilt race 1, Nematodes, Tobacco Mosaic Virus, and Leafspot. <u>Indeterminate.</u>
Tomato, Cherry	'White Cherry'	<i>Solanum lycopersicum</i>	x		59	n/a	Pale yellow cherry tomato average 1 1/8" to 1½" diameter with mild taste; easy to pick off compact plants. <u>Indeterminate.</u>
Tomato, Grape	'Grapette Hybrid'	<i>Solanum lycopersicum</i>	x		75-90	n/a	Clusters of 16-40 1/3 to 1/2 oz. oblong red fruits with distinctive flavor; thin-skinned and juicy; resistant to Fusarium Wilt. <u>Semi-Determinate.</u>
Tomato, Heirloom	'Amish Paste'	<i>Solanum lycopersicum</i>	x		74-90	n/a	Deep red fruits avg. 8 oz.; best for sauces and canning; not overly acidic. <u>Indeterminate.</u>
Tomato, Heirloom	'Black Krim'	<i>Solanum lycopersicum</i>	x		69-90	n/a	Heirloom from Russia; large, dark, deep red, almost shiny black with heavy green shoulders; deep, reddish-green interior; 10-12 oz.; rich in flavor - sweet and tasty; matures extremely early. <u>Indeterminate.</u>

2015 VEGETABLES and FRUIT

Common Name	Variety and/or Cultivar	Botanical Name (Genus and species)	Annual	Perennial	Days to Maturity	Height	Comments
Tomato, Heirloom	'Kelloggs Breakfast'	<i>Solanum lycopersicum</i>	x		80-85	n/a	Large, orange, beefsteak type (up to 16oz.); long-season producer; meaty, juicy, delicious; truly orange in color; great for salads, sandwiches. <u>Indeterminate.</u>
Tomato, Heirloom	'Mortgage Lifter'	<i>Solanum lycopersicum</i>	x		75-85	n/a	Developed in the early 1930's; large, meaty fruits with few seeds; mild, sweet flavored tomato is great for sandwiches and salads; good yields of very large, smooth, pink-skinned fruits even in droughts. <u>Indeterminate.</u>
Tomato, Heirloom	'Prudens Purple'	<i>Solanum lycopersicum</i>	x		75	n/a	Large, 10 - 16 oz., slightly flattened, blemish-free, dark pink, nearly purple fruits with few seeds on large potato leaved vines; mature quite early; delicious flavor and good production; great for hot day and cool night climate. <u>Indeterminate.</u>
Tomato, Heirloom	'Stupice'	<i>Solanum lycopersicum</i>	x		52	n/a	Sugary sweet, red, slightly oval, 2 inch fruit, weighing 1 to 2 oz.; excellent choice for first-of-the-summer salads, snacks, and juicing; bred in the former Czechoslovakia, where its extreme earliness, tolerance to cold, superior flavor and high yields have earned it worldwide attention; tests show an average of 87 fruits picked per plant. <u>Indeterminate.</u>
Tomato, Plum	'La Roma III Hybrid'	<i>Solanum lycopersicum</i>	x		76	36-48"	Vigorous plants fruit abundantly; large, 5-8 oz., meaty fruits are full of flavor; good for canning, pastes and sauces; resistant to Fusarium and Verticillium Wilt and Nematodes. <u>Determinate.</u>
Tomato, Heirloom	'Sunray'	<i>Solanum lycopersicum</i>	x		72-83	n/a	Medium sized plants with high yields; meaty fruits avg. 6-7 oz.; mild flavor and low acidity, great for juices; resistant to Fusarium and Verticillium Wilt. <u>Indeterminate.</u>
Tomato	'Crimson Carmello (F1)'	<i>Solanum lycopersicum</i>	x		70	n/a	Exquisite tasting, French hybrid tomatoes bred especially for fresh eating. Round, red, juicy fruits on tall, vigorous, disease resistant, widely adapted vines; shows less septoria and early blight than most; resistant to Nematodes, Tobacco Mosaic Virus, Fusarium and Verticillium Wilt. <u>Indeterminate.</u>
Tomato	'Defiant PhR (F1)'	<i>Solanum lycopersicum</i>	x		70	36-48"	Named for its defiance of most troublesome tomato diseases including late blight; 6-8 oz., round, mid-sized slicing tomatoes are smooth and medium-firm with good texture and great flavor; deep red internal and external color; high-yielding, medium-sized plants; resistant to Fusarium Wilt and Verticillium Wilt; <u>intermediate resistance to early blight and high resistance to late blight.</u> <u>Determinate.</u>
<u>Other Vegetables:</u>							
Kale	'Dwarf Blue Curled Scotch'	<i>Brassica oleracea</i>	x		55-60	12-18"	Bluish, curly, frilly leaves are both nutritious and colorful; cook in soups or stews, use young leaves in salads; add color and texture to a landscape; low growing with 30" spread; grows best in cool weather; very cold hardy but also can take some heat; a good fall crop.
Kale	'Winterbor'	<i>Brassica oleracea</i>	x		65	24-36"	Frilly blue-green leaves are attractive and tasty; tall and up to 24" wide, a great producer; one of the most winter hardy kales; great for early spring and late fall harvest; sweet and juicy after frost.

2015 VEGETABLES and FRUIT

Common Name	Variety and/or Cultivar	Botanical Name (Genus and species)	Annual	Perennial	Days to Maturity	Height	Comments
Kale	'White Russian'	<i>Brassica oleracea</i> var. <i>fimbriata</i>	x		50	24"	New! Tender, sweet, very cold hardy; leaves are deeply cut and frilled with a grey-green base and white veins; tolerates wet soils; light frost improves flavor; 21 days for baby greens.
Tomatillo	'Toma Verde'	<i>Physalis philadelphica</i>	x		60	3'-6'	Early-maturing, large flat-round green fruit; tart flavor when young, becoming sweeter as it ripens; grow plants like tomatoes; plants need staking; fruits are ready to harvest when husks split and fruit color changes from a yellow green to medium green; perfect for Salsa Verde or as a special addition to any Mexican dish. <u>Semi-determinate.</u>
Fruits:							
Red Raspberry	'Heritage'	<i>Rubus idaeus</i>		x		4-8 feet	Ever bearer; produces two crops on each cane (unless pruned otherwise): an autumn crop on the top 1/3 of the cane and a second crop the following summer (June) on the bottom 2/3 of the cane; fruit is red and sweet; needs well-drained soil; attracts butterflies; native.
Red Raspberry	'Canby'	<i>Rubus idaeus</i> var. <i>strigosus</i> *		x		4-6 feet	This almost thornless plant produces large, tasty bright red berries of good quality; strong vigorous canes support the heavy crop of summer fruit; ideal for freezing, canning, cooking, and fresh eating; resistant to viruses; immune to aphids; requires good soil drainage.
Red Raspberry (semi-thornless)		<i>Rubus idaeus</i>		x		4-6 feet	High producer; edible, showy fruit; bears in both early and late summer depending on pruning; great for jams; deer resistant.
Strawberry	'Ozark Beauty'	<i>Fragaria x ananassa</i>		x		6-12"	Everbearing and heavy producer; sweet scarlet red fruit early summer and fall; self pollinating; very hardy and vigorous; runner plants produce berries their second year; resistant to leaf spot and leaf scorch.
Strawberry	'Tribute'	<i>Fragaria x ananassa</i>		x		6-12"	Day-Neutral and prolific; flavorful plump, medium large berries spring into fall; self-pollinating; tolerates leaf scorch and blight; disease-resistant to red stele and verticillium wilt.
